Mr. Alexander Barus
CEO
PT Indonesia Morowali Industrial Park
Jl. Trans-Sulawesi, Fatufia Village, Dahodopi District
Morowali, Central Sulawesi, 94994
Indonesia
[redacted]

Dear Mr. Barus,

I am writing on behalf of Climate Rights International, an international NGO that conducts research and advocacy on the human rights dimensions of climate change. We have carried out research for a report that we plan to publish on the human and environmental impacts associated with nickel mining and processing in Indonesia, with a focus on Southeast Sulawesi and Central Sulawesi.

Based on more than ninety interviews with community members, our research finds that nickel mining and processing in Southeast Sulawesi, Central Sulawesi, and North Maluku are threatening the rights of people, harming the local environment, and contributing to the climate crisis. Community members told Climate Rights International that their lands have been taken by nickel companies, they were not able to fairly negotiate land sales, and Indigenous Peoples have been denied their legal right to Free, Prior, and Informed Consent (FPIC). In addition, pollution from mining and industrial activities is threatening critical freshwater resources and the ecosystems that people depend on for their traditional livelihoods, threatening their access to food and water, and harming their health. Despite claims that nickel is needed to power the energy transition, massive deforestation for nickel mining and captive coal use for nickel processing are directly contributing to the climate crisis.

We want to ensure that our report accurately reflects the views, policies, and practices of relevant authorities and companies, and we hope that you or your representatives will respond to the following questions, outlined below. Any responses will be reflected in our reporting as appropriate, and we may publish your responses at our discretion and when appropriate, either in full or in part.

Corporate Governance

1. Please provide a full list of all companies currently operating at PT IMIP.

2. Please provide a full list of all companies that have projects under construction at IMIP, have committed to participate in projects at IMIP, or have announced the intention to participate in projects at IMIP.
3. How does PT IMIP ensure that companies operating at the industrial site are in full compliance with Indonesian laws and regulations? Does it conduct regular, unannounced audits?
    a. If yes, please provide a list of audits that have been conducted and provide the results of those audits.
4. We understand that IMIP uses captive coal to power much of its operations.
    a. How many captive coal-fired power plants are currently operational and what is the capacity of each plant?
    b. How many plants are currently under construction? What is or will be the total capacity for each of the coal plants, whether planned or currently operational?
5. Does PT IMIP collect air and water quality data taken within the boundaries of IMIP and/or in the surrounding area? If not, why not? If yes, is that data made publicly available? If yes, how is it made available? If not, why not? Please share the results of any air and water quality data collected.
6. Please provide information about freshwater usage and wastewater treatment at IMIP. How does PT IMIP manage wastewater? Where does hot water from industrial facilities, including coal plants, go and what steps does IMIP take to cool wastewater before it is discharged?
7. Please describe the waste management systems at IMIP. What is the process for dealing with industrial waste, including tailings and coal ash?
8. Is PT IMIP planning to invest in renewable energy? If so, please provide more information about its plans.
9. Does PT IMIP have any plans to phase out coal use at the industrial park? If yes, please describe those plans. If not, why not?
10. Has PT IMIP conducted any assessments or analyses of the risk that climate change poses to its operations in Central Sulawesi, including sea level rise, flooding, and extreme weather events? If so, please provide any documents or reports that describe those potential risks.
11. Does PT IMIP have climate adaptation plans, including plans to adapt to sea level rise and extreme weather events? If so, please elaborate.
12. Please describe the process of acquiring land prior to the development of the industrial park. Did PT IMIP hold public meetings with local communities about the proposed project? If so, please provide information about the dates, locations, and attendance of those meetings. In addition, please detail the information provided to communities at those meetings.
13. How was the price for land determined? Did IMIP offer a flat rate, or did it negotiate with those occupying the land? How much did IMIP offer to purchase lands for? If possible, please provide a list of land acquired and prices paid per plot.
14. It is our understanding that some community members have not received compensation from IMIP for their lands. What steps has IMIP taken to ensure that it

is fairly compensating all landowners, including Indigenous Peoples for their customary lands?

15. Workers at IMIP have stated that they do not have consistent or adequate access to personal protective equipment. Please tell us (1) what PPE is provided to workers, (2) whether it is automatically provided or must be requested, (3) how often the PPE is replaced. What steps does IMIP take to ensure that companies operating within the industrial park are providing adequate PPE?
16. How many occupational injuries have occurred at IMIP since it began operations? Please provide a breakdown of the number of injuries by year, including fatalities; the types of injuries; and what, if any, steps IMIP has taken to improve occupational health and safety at the site.
17. Workers at IMIP have stated that current staffing levels and shifts at IMIP are leading to fatigue and unsafe working conditions.
    a. How long is each shift and how many workers are assigned to each shift?
    b. How many days do workers work in a row, and how many days off do workers have during their off periods?
    c. What protections does IMIP have in place to ensure that workers are not overly fatigued or working in dangerous situations due to the frequency and length of shifts?

Please provide your responses in writing. Your responses can only be considered for inclusion in the report if we receive them by September 4, 2026. Please reply at [redacted] copying [redacted] In addition, please include any other materials, statistics, an or n ormat on you think may be relevant.

I would also welcome the opportunity to speak with you or your representatives. Please let me know if you have any questions or if you would like to arrange a meeting or video conference.

Sincerely,

[redacted]

Brad Adams
Executive Director
